Candle mockup
Help file

Follow these steps to get started

1. Open the .psd file inside photoshop

2. On the layers palette locate the smart layer named «PUT DESIGN HERE». Double click on layer thumbnail to open the smart object container (.psb file)

3. When .psb file opens, paste your design.

4. Save and close .psb file. Those changes will be reflected upon returning to your main psd file.

5. Changing box (or candle or glass) color: on the layers palette locate the layer named «box color»(or «candle color» or «glass color»).Click on the layer and change the color on the properties palette.

6. Changing background: On the layers palette locate the smart layer named «background».Double click on layer thumbnail to open the smart object container (.psb file) When .psb file opens, paste your design.Save and close the .psb file. Those changes will be reflected upon returning to your main psd file.

7. Moving objects: click on object group (named «CANDLE» or «BOX»). Press Ctrl+T (Cmd+T) on your keybord. When bounding box appears click on it and move the object. When you finish press Enter (Return).

8. Changing object size: click on object group (named «CANDLE» or «BOX»). Press Ctrl+T (Cmd+T) on your keybord. Drag a handle on the bounding box. Press Shift as you drag a corner handle to scale proportionately. When positioned over a handle, the pointer becomes a double arrow. When you finish press Enter (Return).

9. Turn on/off shadow and light layers and change opacity to get better results.

10. Turn on/off, copy, move object groups and change their size to create your own unique scene. Save and enjoy!
